

Part I: Overview Information

Department of Veterans Affairs

Funding Opportunity Announcement (FOA)/Request for Applications (RFA)

Number: BX-24-201, CX-24-201, HX-24-201, and RX-24-201

Title: Psychedelics Parent Merit Review Award Pre-application (I02)

Companion Funding Opportunity: BX-24-038/CX-24-038/HX-24-038/RX-24-038

Psychedelics Parent Merit Review Award (I01)

Catalog of Federal Domestic Assistance Number(s): 64.054

Participating Organizations: Veterans Health Administration, Office of Research and Development (VA-ORD)

Components of Participating Organizations:

Biomedical Laboratory Research and Development Service (BLR&D)

Clinical Science Research and Development Service (CSR&D)

Health Services Research and Development Service (HSR&D)

Rehabilitation Research and Development Service (RR&D)

Announcement Type: New

Key Dates

Released/Posted Date: January 5, 2024

Submission, Review and Award Dates: See [Table 2](#), Part II, Section IV.

Expiration Date: December 31, 2025

Executive Summary

Purpose: This FOA/RFA invites Pre-applications (Letter of Intent [LOI] and waiver requests [budget, duration, eligibility, full off-site]) for the Psychedelic Parent Merit Review Award.

VA is committed to safely exploring all avenues that promote the health of our Nation's Veterans. This cross-service FOA/RFA is intended to outline the requirements for applications studying Psychedelic compounds for mental health conditions in BLR&D, CSR&D, HSR&D, and RR&D within ORD. In late September 2023, VHA held a state-of-the-art conference on psychedelic treatments focused on two major objectives to: 1) better understand the current state of scientific evidence and create a strategic framework for future psychedelic treatment research; and 2) determine the necessary steps for potential, system-wide, clinical implementation of these treatments. One of the major outcomes of this process was a plan to develop a FOA/RFA for Psychedelic research projects, particularly testing MDMA (3,4-Methylenedioxymethamphetamine) and Psilocybin for the treatment of mental health conditions (including PTSD and Depression).

The Merit Review Award Program is an intramural funding mechanism to support investigator-initiated research conducted by eligible VA-ORD investigators at VA medical centers (VAMCs) or VA-approved sites. In response to this FOA/RFA, investigators can submit a proposal to any of the four (4) services (BLR&D, CSR&D, HSR&D, or RR&D). Due to the nature of the evidence for Psychedelics at this time and the funding available, ORD is not considering projects/trials funded through the Cooperative Studies Program and/or studies with more than 10 sites.

Mechanism of Support: This FOA/RFA will use the *Non-HHS Pre-application (I02)* activity code for investigator-initiated VA research.

Funds Available and Anticipated Number of Awards: No awards will be made under this announcement. Awards will be made through the companion FOA/RFAs.

Eligible Institutions/Organizations: All VAMCs with an active research program are eligible. See the *VA-ORD Application Guide SF 424 (R&R) (VA-ORD SF 424 (R&R))*.

Eligible Project Directors/Principal Investigators (PD/PIs): ORD is an intramural research program and only funds research conducted by VA-ORD investigators at a VAMC or VA-ORD approved site. See [Section III](#) and the *VA-ORD SF 424 (R&R)*. Additional eligibility requirements may be stated in the companion FOA/RFA.

Number of Applications and Funded Awards: PD/PIs may submit no more than two (2) Pre-applications (I02) in a review cycle. There is a limit of ten (10) Pre-applications total for the life cycle of a research award application, including resubmissions and renewals. PD/PIs are therefore encouraged to combine requests whenever possible (e.g., LOI and any required Psychedelics Parent Merit Review Award Pre-application (I02)

waiver requests). Refer to the companion FOA/RFA for the number of allowed research award applications and funded awards.

Resubmissions: Refer to the companion FOA/RFA.

Renewals: Refer to the companion FOA/RFA.

Number of PD/PIs: Refer to the companion FOA/RFA.

Application Materials: See [Section IV](#) for *Pre-application (I02)* materials. Refer to the companion FOA/RFA for research award application materials.

General Information: For general funding information visit the VA ORD intranet, at <https://vaww.research.va.gov/funding>. This page is not available to the public.

Part II: Full Text of Announcement

Section I. Funding Opportunity Description

Purpose

This FOA/RFA invites Pre-applications (I02) for companion FOA/RFA for Psychedelic Parent Merit Review Award funding opportunity. The Pre-application (Letter of Intent (LOI) and waiver requests budget, duration, eligibility, full off-site research) is the first step in the application process for companion FOA/RFAs.

Each research award application submission must be preceded by a Pre-application LOI, including resubmissions and renewals. The LOI process is designed to provide a systematic and defined approach to enhance the development of successful applications for psychedelic funding, to allow investigators as much time as possible to develop and fine tune applications, and to permit adequate time for required reviews and approvals at the facility level.

The Psychedelic Parent Merit Review Award uses the Pre-application LOI to achieve the following:

- a) Confirm that each application submitted to the FOA/RFA is relevant and responsive to the companion FOA/RFA.
- b) Identify and resolve major problem areas such as investigator budget, duration, eligibility and/or full off-site issues prior to the submission of a full research application.
- c) Plan for appropriate resources that allow for an efficient and effective review process.

Waiver requests (budget, duration, eligibility, full off-site) are project-specific.

Read the companion FOA/RFA prior to submitting a Pre-application (I02).

Section II. Award Information

Mechanism of Support

This FOA/RFA will use the *Non-HHS Pre-application (I02)* activity code for investigator-initiated VA research.

Funds Available

No awards will be made under this announcement. Awards will be made through the companion FOA/RFA.

Section III. Eligibility Information

Eligible Applicants

Eligible Institutions: Applications may be submitted from any VAMC with an active research program.

Eligible Individuals: The general policy for eligibility to receive research support from ORD is described in [Program Guide 1200.15 Eligibility for VA Research Support](#). If companion FOA/RFA allows multiple PD/PIs, eligibility requirements apply to all persons assigned the PD/PI role. For additional eligibility requirements, see companion FOA/RFAs.

Individuals assigned the PD/PI role must be current with all requirements related to intellectual property (VA invention documents and certifications), submission of annual progress reports (Research Performance Progress Reports [RPPRs]), final RPPRs, clinical trials registration and results reporting (i.e., ART/ClinicalTrials.gov) for existing and previous awards.

Other—Special Criteria

Location of Research Space: It is expected that the PD/PI and VA co-investigators will perform all VA-funded research within a VA facility or VA-leased space in accordance with [Program Guide 1200.16: Offsite Research](#). If any of the proposed work will be carried out in non-VA space, a waiver to perform the research off-site must be obtained.

If all the proposed work will be conducted in non-VA space, **a full off-site waiver is required prior to application submission**. It is not customary to grant full off-site waivers. They are considered only under special circumstances.

If only a portion of the proposed work will be conducted in non-VA space, **a partial off-site waiver will be required as part of the Just-In-Time (JIT) process** for applications selected with an intent-to-fund.

Inclusion of Non-Veterans: No non-Veteran enrollment waivers will be considered for this funding opportunity.

Duplicate Submissions: An application submitted to the Psychedelic Parent Merit Review Award **may not** be concurrently submitted to any other R&D Service within VA-ORD (BLR&D, CSR&D, HSR&D, or RR&D) or other VA.

Section IV. Pre-application and Submission Information

Psychedelics Parent Merit Review Award Pre-application (I02)
BX-24-201/CX-24-201/
HX-24-201/RX-24-201

Request Pre-application Information

See the *VA-ORD SF 424 (R&R)* on the VA ORD intranet:

<https://vaww.research.va.gov/funding/electronic-submission.cfm> (this page is not available to the public) for step-by-step guidance on submitting an application through [Grants.gov Workspace](#) or [NIH Application Submission System & Interface for Submission Tracking \(ASSIST\)](#) in response to this FOA/RFA.

Content of a Pre-application Submission

Prepare all Pre-applications using the *VA-ORD SF 424 (R&R)* guidance and applicable templates except where this FOA/RFA instructs otherwise. **Failure to follow instructions may cause delays in submission or withdrawal of applications from review.**

The following guidance supplements the instructions found in the *VA-ORD SF 424 (R&R)* and should be used for preparing an application in response to this FOA/RFA.

1. Type of Submission

Check “Pre-application.”

NOTE: Pre-applications **MUST** be rejected first by the Signing Official (SO) prior to submitting a revised Pre-application, otherwise duplicate submissions will verify in eRA. When a Pre-application is revised and resubmitted, **do not** select Changed/Corrected. “Pre-application” must be selected as the Type of Submission, or the application cannot be processed. A revised Pre-application cannot be submitted after the submission deadline.

4.a. Federal Identifier

For applications marked “New” in Box 8, leave this field blank.

For applications marked “Resubmission” or “Renewal,” the two-letter Service designation and serial number from the previously assigned full research application/award number (e.g., RX001234) **MUST** be entered in this field in order for eRA to connect the Pre-application to the previously reviewed full research application (award code I01). **Do not** enter the previous Pre-application (I02) number as the system will not be able to process the submission.

4.b. Agency Routing Number

Enter the VAMC Station number and city (e.g., 673-Tampa). A Center name may also be included.

4.c. Previous Grants.gov Tracking Number

Leave this field blank even if submitting a revised Pre-application.

8. Type of Application

Check “New” when submitting a Pre-application for the first time.

Check “Resubmission” when submitting a Pre-application for which there is a previously reviewed Pre-application or research application that was not selected for funding.

Check “Renewal” when submitting the first Pre-application requesting additional funding for a period subsequent to that provided by a current award. Check “Resubmission” for all subsequent Pre-application submissions.

15. Estimated Project Funding

- a. Enter total funds requested for the entire project period.
- b. Enter \$0 (zero).
- c. Enter same value from 15.a.
- d. Enter \$0 (zero).

20. Pre-application

Submit a single PDF attachment of the LOI Cover Page and Text Pages (including letter of intent and any waivers) – the file **MUST** be a PDF *flat file* in order to be accessed/viewed in eRA (see [VA-ORD SF 424](#) for guidance on creating/formatting PDFs).

There is no required file name for the attachment, but it cannot be more than 50 characters total, including spaces. For Pre-applications that include one (1) or more documents (i.e., LOI and waiver request(s), or multiple waiver requests), indicate this in the file name (e.g., *LOI and Eligibility Waiver.pdf*).

Do not include the PD/PI (or any other Senior/Key Personnel) Biographical Sketch in this attachment as it is required with the SF 424 [Senior/Key Person Profile](#).

21. Cover Letter Attachment

Do not upload any attachment – an error will be received. This is a system validation.

LOI Cover Page

NOTE: For Resubmissions for which there is a previous Pre-application and full research Application that was not selected for funding, submit only this Cover Page.

In the following order, the PD/PI must provide:

- a) **Companion FOA/RFA:** Companion FOA/RFA number and title to which the full application will be submitted.
- b) **Service:** Service to which the full application will be submitted.
- c) **PD/PI Data:** Name, current and expected VA 8ths, whether a clinician or non-clinician and a U.S. Citizen. Provide this information for all personnel assigned the PD/PI role.

Psychedelics Parent Merit Review Award Pre-application (I02)

BX-24-201/CX-24-201/

HX-24-201/RX-24-201

- d) **Clinical Trial:** Whether the proposed study is a clinical trial. See [ORD Sponsored Clinical Trials](#).
- e) **Million Veteran Program (MVP):** Whether the proposed study uses MVP data. Steps to apply for access to and approval to use MVP data:

Step 1: Registration in Genhub and Preparatory to Research Access

- Investigators interested in the opportunity to access MVP data for Merit projects must register for an account in GenHub (<https://genhub.va.gov>) where they can explore aggregate data with the cohort builder and results explorer tools from the MVP cohort to help prepare their Pre-applications/Letters of Intent (LOI) and full research applications.
- For example, investigators can check how many of their cohort of interest have associated Genotype, WGS, nutrition data.

Step 2: MVP Data Use Request (New Requirement)

- Investigators wishing to access MVP data and include MVP aims in their proposals must now submit a MVP Data Use Request to MVP via email to MVPLOI@va.gov **AND** receive an MVP approval memo in advance of the appropriate Pre-application/LOI submission deadline. This is a new feasibility check step for proposals with MVP aims that must be completed prior to submission of a Pre-application/LOI and is a requirement **separate and in addition to Pre-application/LOI requirements**. **Information on the MVP Data Use Request process can be found here:** <https://genhub.va.gov/file/view/772565>. Investigators need to register for a GenHub account from their VA computer before accessing the information.
- MVP will complete a feasibility review based on the information provided by the PD/PI. Concerns regarding requested data or the feasibility of completing the proposed research may be discussed with the investigator prior to a final determination being made.
- MVP Data Use Requests are accepted on a rolling basis. **Please submit requests at least two (2) weeks in advance of a Pre-application/LOI or full research application deadline and allow at least 1-2 weeks for review.** Even earlier submission is advised, as this will give the investigator time to adjust their Pre-application/LOI or full research application if needed.
- MVP will provide an Approval Memo to the investigator that must be included as a part of a Pre-Application/LOI and full research application submissions.
- The Approval Memo will be valid for 12 months from the date of the memo. Any changes made to the final proposal related to MVP (aims, use of MVP data, etc.) must be resubmitted and reviewed by MVP.
- **Any Pre-application or full research application with MVP aims that does not have an Approval Memo may be administratively withdrawn from review.**

Step 3: Submission of Proposals

- Investigators should submit a **full research application (including the MVP Data Use Approval Memo as an appendix)** according to the dates and requirements of the RFA

to which they are applying. The corresponding peer-review process will occur using existing ORD-based scientific and administrative review mechanisms.

- Approval of proposals and final funding decisions will be communicated to the PIs/stations via the usual Service-specific mechanisms.

General Questions may be directed to MVPLOI@va.gov.

- f) **Scientific Review Group (SRG):** Preference for assignment to a specific SRG and the SPM(s) with whom there have been discussions regarding this application. Resubmission applications are automatically assigned to the original SRG unless specifically requested otherwise or deemed necessary by ORD.
- g) **Scientific Review Concerns:** Review concerns (e.g., expertise needed to review the application, potential conflicts/reviewers that may have bias). Requests/suggestions for specific reviewers will not be accepted. Requests to exclude reviewers that are not fully justified will not be considered.
- h) **Associate Chief of Staff (ACOS) or Coordinator for R&D:** Name, title and signature of ACOS/R or designee. If signed by designee, write 'p.p' in the signature space and sign name after it. Below the designee's signature should be the name and position title of the ACOS/R.

LOI Text Pages

Sections a) through i) not to exceed three (3) pages.

In the following order, the PD/PI should state:

- a) **Purpose:** The goals and specific objectives of the proposed research; the question to be addressed, hypothesis to be tested, methods, concepts, systems or devices to be developed or evaluated.
- b) **Background:** The scientific rationale for the proposed research and its relationship to other major research findings. Explain how this research will advance knowledge in psychedelic research. Describe the significance of the research and how it relates to psychedelic areas of special emphasis/consideration. Indicate how this research directly benefits Veterans, how it contributes to the quality of services provided by VA, and advances Psychedelic research.
- c) **Innovation and Impact:** Summarize the innovative aspects of the project and why they are likely to improve care if the project is successful.
- d) **Specific Aims:** Provide a numbered list of the specific aims and describe the component of the study relevant to each one.
- e) **Methods and Research Plan:** An outline of the proposed study design and methods. If project is a clinical trial, please describe intervention and controls. Identify Veteran subject Population, sample size and rationale for inclusion or exclusion of Population served (it is required that women and members of diverse ethnic and racial groups be recruited, unless contraindicated due to the study's aims), and include datasources. Identify key issues that may have an impact on the success of the proposed project,

such as: subject recruitment, participation of specialized personnel, space and budget. Specify if the proposed research will involve animals and, if so, the time frame to clinical application. Indicate implications for technology transfer and potential for replication.

Note – for clinical trial proposals only: List any competing trials on this topic that would draw subjects from the same Veteran Population. State whether the study will be U.S. Food and Drug Administration (FDA) regulated and/or will require agreements with industry or other non-VA entity, patents/licensing, etc.) If the proposed study is medication trial, do you already have an agreement with a company to receive the medication? Do you have a matched placebo? Describe how the medication will be obtained. Please comment on your VAMC’s experience with Drug Enforcement Administration (DEA) licensing for drugs. Note: The quality of the agent/product should be consistent with FDA manufacturing standards.

- f) **Primary Outcomes/Endpoints:** Provide a list of the anticipated primary outcomes and endpoints of the study. *Note:* If the project is a clinical trial, the trial and primary endpoint should be the focus of the study.
- g) **Common Data Elements:** To assist in building the evidence-base to support wide-spread application of these compounds, VHA is requesting (where possible) that human subjects research projects funded by this mechanism collect, report and store common data in a VA central repository. Please document common data elements to be used and how the data will be stored.
- h) **Resources needed for the study with associated costs:** Provide budget details. Refer to the companion FOA/RFA for project duration and budget caps.
- i) **Project History:** Indicate whether this study is new, a continuation of an existing project (include years funded) or related to a previously unfunded project. Indicate the project/eRA grant number, title and date of the previous related submission.
- j) **Research Site:** State the name of the lead facility where the research (subject and laboratory work) will take place. If a portion of the project will be performed at any other site(s), identify the site location(s).
- k) **Cited References:** Limit to one (1) page.
- l) **Key Personnel:** The *Research & Related Senior/Key Person Profile(s)* is required in the Pre-application (I02) package (see Research & Related Senior/Key Person Profile(s) section below). Include all named individuals on the projects, including writers of support letters here using the format in Table 1 below.

Name	Institution(s)	Role and Percent Effort	Expertise

Table 1

Waiver Requests

Approved waivers are good for the lifecycle of a research application and the duration of a research project, if funded. Approved waivers must be included in the Letters of Support attachment of the full research application submitted to the companion FOA/RFA.

To Submit a Budget and/or Duration Waiver Request: Rare exceptions to the award budget cap and/or duration may be granted. Exceptions may be requested in the form of a memo addressed to the Director of the appropriate service (BLR&D, CSR&D, HSR&D, or RR&D), from the VAMC Director with the endorsement of the ACOS for R&D. Include the following:

- a) **Proposed Project Budget:** Use the *Summary Budget Worksheet* to show annual and total project costs. The worksheet template is available at <http://vaww.research.va.gov/funding/electronic-submission.cfm>.
- b) **Budget Justification:** Provide appropriate detail by expense category to justify inclusion in the project budget.
 - i. **Personnel:** List names, roles and duties, associated calendar months, grade, step, eighths, salary and fringe benefits requested. Note variation in effort across budget periods.
 - ii. **Equipment:** Include a discussion of why the equipment is needed and why existing equipment cannot be used. Describe the equipment used or to be used in the generation of pilot data for the research application.
- c) **Special Consideration:** Explain why the project requires special funding consideration based on the topic, the nature of the study, unusual resource requirements or other factors.
- d) **Alternative Budget:** Describe how the proposed study could be completed or modified if the request to exceed the award budget cap and/or duration is denied.

A budget waiver does not guarantee that a project will be funded at the level requested. The full research application with the requested budget will be reviewed by the SRG.

To Submit an Eligibility Waiver Request: Exceptions may be requested in the form of a memo addressed to the Director of the appropriate service (BLR&D, CSR&D, HSR&D, or RR&D) from the VAMC Director with the endorsement of the ACOS for R&D and Chief of Staff.

To Submit a Full Off-Site Waiver Request: A full off-site waiver request may be submitted in the form of a memo addressed to the Director of the appropriate service (BLR&D, CSR&D, HSR&D, or RR&D), from the VAMC Director with the endorsement of the ACOS for R&D. In the following order, state:

- a) **Importance of the Research to the VA Research Portfolio and Patient-Care Mission:** The importance of the proposed area of research to Veterans' health issues and the contribution of the specific research to our understanding or treatment of a particular disease or health problem must be clearly described.

- b) **Need to Use Unique or Specialized Facilities or Equipment not Available at VA:** Describe the specialized equipment or unique facilities that are not available or cannot be reproduced at VA. Briefly explain why the proposed research cannot be done without access to these facilities or equipment. Indicate if there is a memorandum of agreement, memorandum of understanding or any such arrangement with the owner of the off-site space.
- c) **Lack of a Suitable or Sufficient Performance Site Within VA Space:** If adequate space for an investigator's research program is not available on-site, the medical center must demonstrate that VA-funded investigators occupy all usable VA laboratory space or explain alternative space assignments. A spreadsheet or table detailing VA research space utilization must be submitted with the following information included for each room:
- i. Room number
 - ii. Use (office, laboratory, core facility, etc.)
 - iii. Research space in square footage
 - iv. Investigator assigned to that room
 - v. Investigator's funding source(s)
- d) **Long- and Short-term Plans to Acquire Additional Research Space:** Clearly describe long- and short-term plans to acquire additional research space. Plans to acquire additional space may include construction of new research space, renovation of current research space, renovation of other (non-research) space within the VAMC or negotiation with an affiliate institution for leased space. During construction or renovation of additional research facilities, plans for interim use of off-site space prior to relocation of investigators to VA-controlled space will be considered. If interim use of off-site space is requested, a timetable for relocation of off-site investigators to VA-controlled space must be provided.
- e) **Status of Formal Lease Agreements that will be or have been Negotiated for Research Space:** Clearly explain the terms and current status of any lease agreements. Plans for interim use of off-site space during the final stages of lease negotiations will be considered. If a lease agreement is to be negotiated, it is preferred that it be for a block of contiguous space rather than for scattered independent laboratories.

Research & Related Senior/Key Person Profile(s)

Senior/key personnel are defined as all individuals who contribute in a substantive, measurable way to the scientific development or execution of the project, whether or not salaries are requested. Consultants may be included if they meet this definition.

A current biographical sketch is only required for personnel assigned the PD/PI role.

Current & Pending Support documents are not required for the Pre-application.

Submission, Review and Anticipated Start Dates

Table 2. Deadline*, Review and Award Dates

Submission Cycles	Cycle I (Summer- HSR&D and RR&D)	Cycle II (Fall- BLR&D and CSR&D)	Cycle III (Winter- HSR&D and RR&D)	Cycle IV (Spring- BLR&D and CSR&D)
MVP Data Use Request	March 29	June 28	September 29	December 29
Pre-application (I02) – Letter of Intent & Waiver Request Submission Deadline <i>Applications submitted without a letter of intent for the current review cycle and necessary waiver approvals will be withdrawn.</i>	April 1	April 1	October 1	October 1
Begin Submitting Applications to RFA	May 15	August 15	November 15	February 15
Down-to-the-Wire Application Submission Deadline <i>After this date the full two (2)-business day application viewing window cannot be used.</i>	5 business days prior to the Verification Deadline			
Application Submission Deadline to Grants.gov <i>Changed/corrected applications submitted after this date will be withdrawn.</i>	3 business days prior to the Verification Deadline 5:00 p.m. local time			
Verification† Deadline in eRA <i>Once verified, an application is considered final and no other version will be accepted for review.</i>	June 15	September 15	December 15	March 15

Review and Award Cycles	Cycle I (Summer- HSR&D and RR&D)	Cycle II (Fall- BLR&D and CSR&D)	Cycle III (Winter- HSR&D and RR&D)	Cycle IV (Spring- BLR&D and CSR&D)
Scientific Merit Review	August	November- December	February-March	May-June
Administrative Review	August- September	January- February	March-April	July-August
Earliest Project Start Date	Upon completion of JIT	Upon completion of JIT	Upon completion of JIT	Upon completion of JIT

*If the deadline falls on a weekend or Federal holiday, the due date is the next business day.

*Verification occurs on the 3rd business day after receipt of an application with no errors or only warnings.

Submitting an Application Electronically

For guidance on submitting an application in response to this FOA/RFA, see the *VA-ORD SF 424 (R&R)*.

Application Submission and Processing: For guidance, see the *VA-ORD SF 424*.

VA-ORD will not penalize PD/PIs for an eRA Commons or Grants.gov system issue; however, unless there is documentation of a processing error at either Grants.gov or eRA Commons, **applications that fail to meet either the application submission or verification deadline will not be accepted for review.** In such cases, prior approval will be required for late submission. The respective Service Program Review staff must be notified of any Grants.gov or eRA system errors prior to the submission deadline.

BLR&D: vhacoblcsrdrev@va.gov

CSR&D: vhacoblcsrdrev@va.gov

HSR&D: vhacoscirev@va.gov

RR&D: Kristy-Benton-Grover (Kristy.Benton-Grover@va.gov)

Section V. Application Review Information

Upon receipt, Pre-applications submitted in response to this FOA/RFA will be reviewed administratively for:

- Relevance to the purview of Psychedelic research;
- Responsiveness to the companion FOA/RFA noted;
- Applicant eligibility;
- Proposed project budget and duration; and

Psychedelics Parent Merit Review Award Pre-application (I02)
 BX-24-201/CX-24-201/
 HX-24-201/RX-24-201

- e) Proposed research location(s).

PD/PIs will receive an eRA system notification indicating the decision.

Section VI. Agency Contacts

ORD welcomes the opportunity to answer any questions concerning this FOA/RFA.

Scientific/Research Contacts

Programmatic inquiries related to Merit Review Award submission or review should be made by the PD/PI's ACOS or AO and directed to appropriate Service Program Review staff. Contact the mental health SPMs with questions regarding scientific issues raised in the summary statement or the scientific content of an application to be submitted. Contact information for ORD staff:

Dr. Vetisha L. McClair, Vetisha.McClair@va.gov

For Grants.gov or eRA Commons questions/issues: vhacordera.vhacordera@va.gov.

Financial Management Contacts

BLR&D: Sara Clark, Sara.Clark@va.gov

CSR&D: Lisa Eiben, Lisa.Eiben@va.gov

HSR&D: Diane Murphy, Diane.Murphy3@va.gov

RR&D: Tiffany Asqueri, Tiffany.Asqueri@va.gov
